INDEX TO VOLUME 2

The index covers only the major papers. It does not include the abstracts. For the abstracts there arse separate *author* indices on pages 461-463 and 571-573. If it is desired to locate an abstract, author unknown, or search for a subject, the synopses of programs on pp. 310-311 and 465-466 will prove useful in locating appropriate sections of the program showing titles and authors. Thence one may turn to the abstract desired.

Society business, programs, etc., are entered only under *American Society of Zoologists.*

Abstracts, see note above.
  author index, annual meeting, 570.
  author index, summer meeting, 461.
  of annual (December) meeting, 501.
  of summer meeting, 385.
Action of estrogens, 367.
  of thyroid hormones, 373.
Activation, neural, 55.
Adaptations for bipedal locomotion, 191.
American Society of Zoologists,
  Committees, 1.
  Divisional Officers, 1.
  Officers for 1962, 1.
  President's Address, 573.
  Proceedings of 58th annual meeting, 2.
  Program of meetings, 59th annual, 467.
  Program of meetings, summer 1962, 312.
  Supplementary membership list, 379.
  Treasurer's report, 118.
American Zoologist,
  Directions for authors, ii.
  Editorial Board, i, 117.
  Editor's note for February issue, 4.
  for May issue, 117.
  Subscriptions, ii.
ANDREW, WARREN. Cells of the blood and coelomic fluids of tunicates and echinoderms, 285.
Androgens, in kidney, intracellular regulations by, 361.
Appendages, origin of paired, 127.
Arthropod, central nervous system, 67.
AUFFENBERG, WALTER. A review of the trunk musculature in the limbless land vertebrates, 183.
Behavior, neural mechanism of, 105.
Bipedal locomotion, adaptations for, 191.
Bipedalism, general phenomenon of, 205.
Blood cells, insect, pathology of, 257.
  in tunicates and echinoderms, 285.
Body fluids, echinoderm, 275.
Body form, in scombroid fishes, 143.
BOOLOOTIAN, RICHARD. The perivisceral elements of echinoderm body fluids, 275.
BULLOCK, T. H. Integration and rhythmicity in neural systems, 97.
Calcium, replacement mechanism, 353.
Cells, insect blood, pathology of, 257.
  tunicate and echinoderm blood and coelomic fluid, 285.
Cellular endocrinology, 337.
Central nervous system, arthropod, 67.
Coelomic fluids, cells of, in tunicates and echinoderms, 285.
Conduction, physiology of, 5.
DU BRUL, L. LLOYD. The general phenomenon of bipedalism, 205.
EATON, THEODORE H., JR. Adaptive features of the fore limb in primitive tetrapods and mammals, 157.
Echinoderm, body fluids, perivisceral elements of, 275.
  cells of blood and coelomic fluids of, 285.
Embryologist, visits Japan, 119.
Estrogens, mechanism of action of, 367.
Fishes, scombroid, 143.
Flight, in vertebrates, 161.
FLOREY, ERNST. Recent studies on synaptic transmitters, 45.
Fluids, coelomic, of tunicates and echinoderms, 285.
  of echinoderm body, 275.
Fore limb, adaptive features of, 157.
GANS, CARL. Terrestrial locomotion without limbs, 167.
Gliding, in the vertebrates, 161.
HAMBURGER, VIKTOR. An embryologist visits Japan, 119.
Hemocytes, insect, current concepts of, 209.
  morphology of insect, 247.
HILDEBRAND, MILTON. Walking, running, and jumping, 151.
Hormone, action, role of ionic factors in, 337.
  thyroid, action of, 373.
HOYLE, GRAHAM. Comparative physiology of conduction in nerve and muscle, 5.
Impulses, initiation of, 27.
Insect, blood cells, pathology of, 257.
  hemocytes, current concepts of, 209.
  hemocyte morphology in, 247.
Ionic factors, in hormone action, 337.
Integration, in neural systems, 97.
Intracellular regulation, by androgens, in kidney, 361.
Invertebrate hemocytes, 209.
Japan, an embryologist visits, 119.
JONES, JACK COLVARD. Current concepts concerning insect hemocytes, 209.
Jumping, 151.
KENNEDY, DONALD. The initiation of impulses in receptors, 27.
Kidney, intracellular regulations by androgens in, 361.
KOCHAKIAN, CHARLES D. Intracellular regulations in the kidney by androgens, 361.
Land vertebrates, limbless, 183.
Limb, fore, adaptive features of, 157.
Limbless, land vertebrates, 183.
Limbs, terrestrial locomotion without, 167.
Lizards, bipedal locomotion of, 191.
Locomotion, bipedal, of lizards, 191.
  terrestrial, without limbs, 167.
Mammals, adaptive features of fore limb, 157.

MAYNARD, DONALD M. Organization of neuropil, 79.
Mechanism, a calcium replacement, 353.
estrogens, action of, 367.
of action of thyroid hormones, 373.
of behavior, neural, 105.
Melanophore, hormone action in, 337.
Morphology, hemocyte, in insects, 247.
Muscle, conduction in, 5.
neural activation of, 55.
Musculature, in limbless land vertebrates, 183.
Nerve, conduction in, 5.
Nervous, central, system in arthropods, 67.
Neural, activation, 55.
mechanism of behavior, 105.
systems, integration and rhythmicity in, 97.
Neuropil, organization of, 79.
NOVALES, RONALD R. The role of ionic factors in hormone action on the vertebrate melanophore, 337.
NURSALL, J. R. Swimming and the origin of paired appendages, 127.
Organization of arthropod central nervous system, 67.
of neuropil, 79.
Origin, of paired appendages, 127.
Paired appendages, origin of, 127.
Parathyroid function, 353.
Pathology, of insect blood cells, 257.
Perivisceral elements of echinoderm body fluids, 275.
Physiology, of conduction, 5.
Primitive tetrapods and mammals, fore limb in, 157.
Receptors, initiation of impulses in, 27.
Refresher Course, 5.
Replacement mechanism, a calcium, 353.
Rhythmicity, in neural systems, 97.
RIZKI, T. M. Experimental analysis of hemocyte morphology in insects, 247.
ROEDER, KENNETH D. The neural mechanisms of behavior, 105.
Running, 151.
SAVILLE, D. B. O. Gliding and flight in the vertebrates, 161.
Scombroid fishes, 143.
SNYDER, RICHARD C. Adaptations for bipedal locomotion of lizards, 191.
STERN, CURT. In praise of diversity, 575.
Swimming, and the origin of paired appendages, 127.
performance in the scombroid fishes, 143.
Symposium on Vertebrate Locomotion, 117.
Synaptic transmitters, 45.
TALMADGE, ROY V. Parathyroid function: a calcium replacement mechanism, 353.
TAPLEY, DONALD F. The mechanism of action of thyroid hormones, 373.
Terrestrial locomotion, without limbs, 167.
Tetrapods, adaptive features of fore limb in, 157.
Thyroid hormones, mechanism of, 373.
Transmitters, synaptic, 45.
Trunk musculature, in limbless land vertebrates, 183.
Tunicates, cells of blood and coelomic fluids of, 285.
VAN DER KLOOT, WILLIAM G. Muscle and its neural activation, 55.
Vertebrate locomotion, 127.
melanophore, ionic factors in hormone action of, 337.
Vertebrates, gliding and flight in, 161.
limbless, trunk musculature in, 183.
VILLEE, CLAUDE A. Observations on the mechanism of action of estrogens at the cellular level, 367.
Walking, 151.
WALTERS, VLADIMIR. Body form and swimming performance in the scombroid fishes, 143.
WIERSMA, C. A. G. The organization of arthropod central nervous system, 67.
WITTIG, GERTRAUDE. The pathology of insect blood cells: a review, 257.
